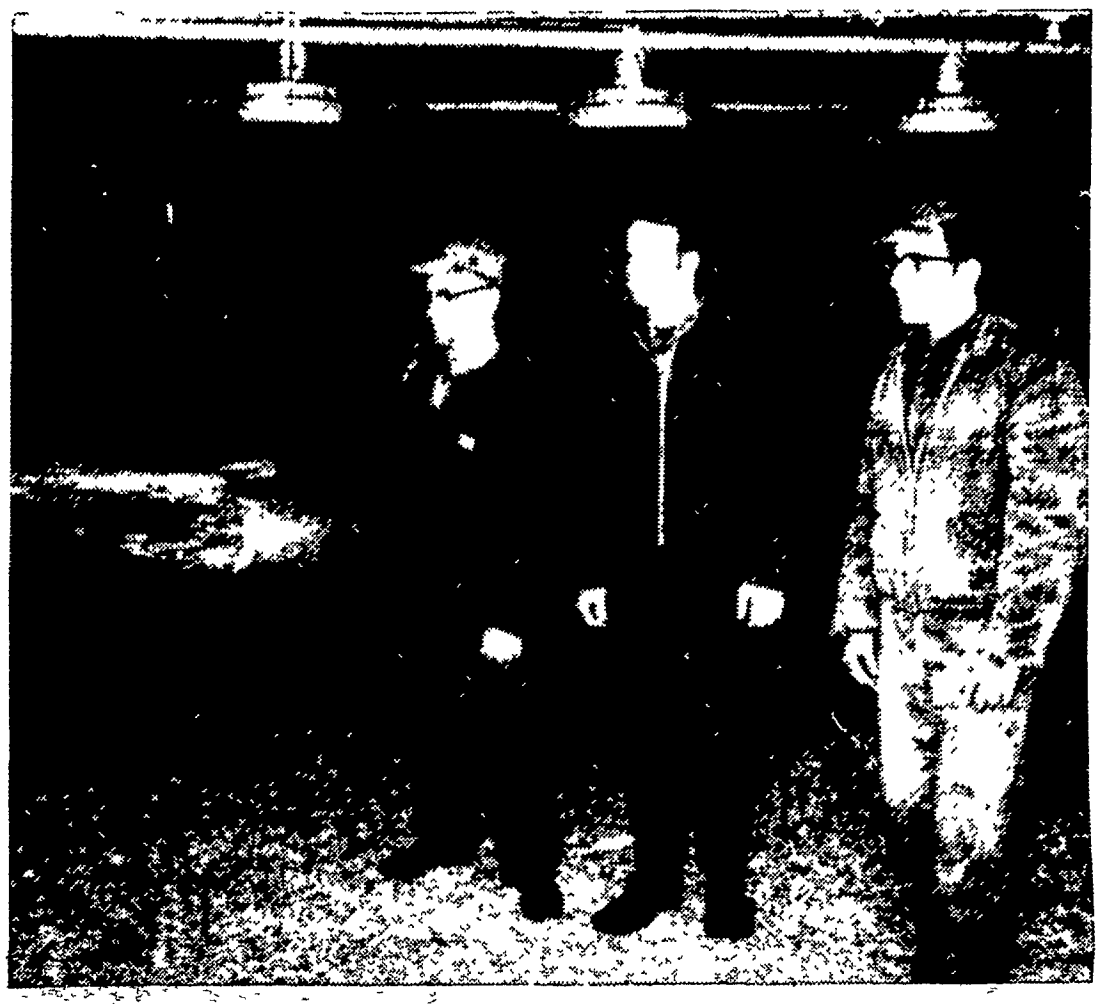
Lancaster Farming

VOL. 14 NO. 14 | Lancaster Farming, Saturday, March 1, 1969 | $2.00 Per Year



DISTRIBUTING GREEN WOOD CHIPS in the 512' x 40' poultry house at the Charles Good Farm, 1415 Lime Valley Road, Lancaster. Jacob Burkholder directs the placement of the shavings while Marlin (center) and John Good watch. The green wood chips are made from logs by a special wood chipping machine at Denver Wood Products, Inc. in New Holland.

L. F. Photo

New Green Wood Chipping Plant Is Making Poultry Litter From 15 Ft. Logs

Tractor-trailer loads of chips are what you can now find at 403 South Custer Avenue in New Holland Not potato chips, wood chips, the kind used in poultry houses for litter

And the chips are made on the premises of the Denver Wood Products Inc, a subsidiary of Victor F Weaver, Inc It is the only place in Southeastern Pennsylvania where whole logs are made into chips.

Making wood chips started for the Weaver organization in August of 1968 when they purchased a wood shaving and litter business from owners with a plant located between Reamstown and Adamstown This operation was moved to New Holland in January Earl Groff is the manager.

Pulpwood logs are delivered to the yards in bundles The logs come in lengths up to 15 feet and they may be three to 20 inches in diameter A mechanical hoist stores the bundles until the logs are needed to keep the chipping machine working.

The chipping machine might be described as a huge sauerkraut maker A box holding one to 10 logs moves back and forth

"Hippies" Prefer Milk Dairymen Told At Meet

"It is difficult to see the importance of Agriculture through a supermarket window," a group of Lancaster County Dairymen were told Wednesday afternoon. Speaking at the Inter-State District #7 annual meeting at the Hostetter's Dining Hall, Mt. Joy, Dr. James C Honan, general manager said, "The lady going through the check-out counter is not interested in agricultural problems. Our problem is to get her to not be antagnistic to farmers."

"Every dairy farmer should know that every time there is a riot anywhere, deliveries of milk stop in that area of disturbance Milk deliverymen are robbed, mugged or killed every week. Indirectly it is your problem in lower Class 1 sales"

Noting a survey among hipp-

Soil & Water District Meeting Is March 4

The Lancaster County Soil and Water Conservation District Annual Dinner Meeting is scheduled for Tuesday, March 4, at the Farm and Home Center, 1383 Arcadia Road. Starting time is 6:30 p.m.

Chuck Slaton Public Relations Director for the Soil Conservation Service will make a special presentation and a family style chicken dinner will be served. Ticket price is $3.25 per plate and reservations may be made until Monday, March 3 by calling Vincent Hoover, at 786-3227.

Dairy Day Program Set Tues., March 11

The Annual Lancaster County Dairy Day Program is announced this week to be held at the Farm and Home Center on Tuesday, March 11. Sponsored by the County Extension Service, Victor Plastow, Associate County Agent, reported the following program for the all-day affair·

9:30 A.M. — Promotional Film — "The Dairy Industry", Courtesy, Atlantic Dairy Association.

10:00 A M. — "Herd Health Problems Related to Mastitus", Dr. Samuel Guss, Extension

DHIA Directors Vote $1000 Farm & Home Gift

The directors of the Lancaster County Red Rose DHIA voted to present a $1,000 check to the current Farm and Home Foundation completion fund campaign on Monday night The decision was made at the regular board meeting in the Farm and Home Center. Jacob Houser, Jr., treasurer, was directed to present the check to one of the co-chairmen of the drive and seek newspaper coverage of the presentation.

In other business, new officers were elected for the coming year. They are. Richard Hess,

Crops And Soils Program Features Timely Subjects

"If you ignore labor management cost," a farm management specialist said Tuesday, "You can produce corn for less than $1 per bushel Speaking on the subject, "Let's Look at Corn Production Costs" at the Lancaster County Crops and Soils day program in the Farm and Home Center, Jesse Cooper reported on the production figures submitted by 12 farmers from four southeastern Pennsylvania counties including one from Lancaster County

The production figures showed a wide range in total cost per bushel — from a low of 56 cents to a high of $2 39 "With corn prices the way they are, Cooper said, "obviously not everybody who is should be raising corn." The specialist did point out that these farmers were trying to

From Where We Stand...

Closing The Generation Gap

We are deeply concerned with what is going on at our agriculture college — Penn State University — in the way of riots. In the depression years of the early and middle 1930's, a college education was a privilege, often reserved for those with the stamina to work and go to school at the same time. It is exceedingly difficult for people of that generation to view with a great deal of tolerance, the riots and vandalism that are making a shambles of college campuses today — a condition that seems to go along with the assumption that higher education is an inalienable right. How inalienable this right remains may depend on the course of inflation.

The cost of going to school is soaring, and education is among all the other fine social goals threatened by the declining value of the dollar. For example in Oregon, the State Board of Higher Education has revised upward the cost estimates of building projects proposed in 1967. Rising construction costs caused the Board to boost its recommended outlay by hundreds of thousands of dollars in the space of one year, and eventually these additional outlays will be reflected in higher tuition fees and other costs of going to college.

Present day affluence may partially explain the generation gap we hear so much about. But, rising costs of inflation may help close that gap as young people begin to learn that a college education is something to be respected, treasured and earned — not taken for granted.

Re-examination Needed

One thing President Nixon has done which has met with favor has been to re-examine matters such as welfare payments from top to bottom. Instead of giving snap judgment on these matters, he has his task force re-examine the system from beginning to end.

And that is what we need in Harrisburg today! For if Governor Shafer would do nothing more than re-examine some of the vast expenditures which continue from year to year, he would likely find funds to make up the supposed deficits of today without the need of discussing an income tax along with boosts in other taxes on the books.

And while most of us are concerned over the possibility of a state income tax, a move is on foot to give state legislators a pay boost of from $7,200 to $12,000 a year plus an increase in their expense accounts from the current $4,800 non accountable expense allowance to $7,000 , but the recipients be made to account for every penny

This salary hike is the substance of recommendations of the Commission for Legislative Modernization, whose 12 members were hand-picked by the legislature, announced at Harrisburg earlier this month. A 60 per-cent pay hike seems to be the commission's version of "modernization."

The recommendations were among 56 contained in a report based on a five-month study of the legislative branch of the state government. The commission also recommended that:

1. Legislators give full accounting of all their reimbursable expenditures.

2. A special citizens commission be formed to recommend future salary raises for legislators, judges, the governor and cabinet members.

3. Legislators be required to disclose relevant financial or occupational interests and that lobbyists report their expenses.

4. The number of standing committee in the House and Senate be reduced to 13.

5. Safeguards be taken to insure against legislators voting for absent collegues.

6. That the legislators' work week be kept at least to or above a three-day minimum for legislative sessions.

The added compensation would cost about $1.8 million, only a small share of Governor Shafer's budget which was $493 million in the red.

Most lawmakers stated ways would be sought to cut proposed spending and hopefully, avoid new taxes.

We fail to see how a legislature could now turn around and vote its members the proposed increases.

The Commission admitted that the current salary received by Pa. Lawmakers compares favorably with that paid to legislators in other states. The report said Pennsylvania ranks *sixth from the top.*

Last year, the Senate was in session only 61 days, the House 54, although, time is spent in committee work, etc.

A more REASONABLE increase may be justified and certainly more easily understood by the electorate.

Across The Fence Row

Failure is the line of least persistence.

"I have but one lamp by which my feet are guided, and that is the lamp of experience. I know of no way of judging the future but by the past." Patrick Henry.

Lots of people know a good thing the minute another fellow sees it.

If you think the world owes you a living, hustle out and collect it.

A man who drives while drunk, should carry his coffin in his trunk

Any fool can criticize, condemn, and complain . . . and most fools do.

"Postage in the past few years has soared, while the quality of service in the post office has deteriorated to a point where customers have every right to be infuriated" — Adams, N.Y., Journal.

"We Americans have learned we can make a lot of money by charging one another too much for goods and services, but we are making little progress in learning that this kind of money isn't worth much" — Alamo, Texas, News.

Local Weather Forecast

(From the U. S. Weather Bureau at the Harrisburg State Airport)

The five-day forecast for the period Saturday through next Wednesday calls for temperatures to average near normal with daytime highs in the 30's to low 40's and overnight lows in the 20's. Little day to day change

Precipitation may total less than one-fourth inch with snow flurries about Tuesday.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W. ALTHOUSE

THE MYSTERY

Lesson for March 2, 1969

Background Scripture Mark 8 27 through 9 50. **Devotional Reading** John 16 25 33.

In a sense, the first half of the Gospel according to Mark is a mystery story. Have you noticed? Let me refresh your memory with some of the clues that have appeared along the way.

(1) Up to this point, only the "unclean spirits" of those who are sick in mind have hinted at Jesus' true identity:

Rev. Althouse

And immediately there was in the synagogue a man with an unclean spirit; and he cried out . . . "I know who you are, the Holy One of God." (Mark 1:23, 24 RSV) (See also Mark 3:11; 5:2-7.)

(2) **Whenever he is recognized, Jesus orders the unclean spirits to keep secret his true identity: But Jesus rebuked him, saying, "Be silent and come out of him!"** (Mark 1:25 RSV)
And he strictly ordered them not to make him known. (Mark 3:12 RSV)

(3) He frequently requested silence of those whom he had healed: **And he sternly charged him . . . "See that you say nothing to anyone".** (Mark 1:43, 44 RSV)
And he sent him away to his home, saying, "Do not even enter the village". (Mark 8:26 RSV) (See also 5:19, 43; 7:36)

(4) People frequently wondered who he was, as though they suspected that he was someone more than he appeared to be:
And they were filled with awe, and said to one another, "Who then is this, that even the wind and sea obey him?" (Mark 4:41 RSV) (See also 1:27; 2:12)

Who is this man?

The writer of Mark, then, has been building up a sense of suspense, an aura of mystery so that the reader will ask, or even demand, **Really, who is this man?** When we reach Mark 8, we have come to the point at which he is ready to begin to shed some light upon the mystery.

The setting is Caesarea Philippi, a less populous area north of Galilee. The disciples probably assumed that Jesus was taking them there for one of the periodic rests they took when their energies were depleted. There would be no crowds here to follow them about, no scribes and Pharisees to snipe at them with their cynical questions. In this gentile city nestled at the base of Mount Hermon they could catch their breath before going back to their arduous tasks.

If this is what they thought, however, they were wrong. Their sojourn here was to be the climax of Jesus' Galilean ministry. The course of his mission in the days ahead would depend upon their conversations with him in this place.

Two questions

Light is shed on the mystery as Jesus asks and the disciples answer two questions. The first of these is the easier of the two: "Who do men say that I am?" (Mark 8:27) The disciples easily remember some of the suggestions that they have heard from the crowds. Some believe him to be a resurrected John the Baptist. There was a similarity in what these two men said concerning the kingdom of God. Others, remembering that Malachi had promised that Elijah would return before the "terrible day of the Lord comes" (Malachi 4:5, 6), identified him thus. Still others saw him as one of the other great Hebrew prophets.

Then Jesus asks the most important question of all: "But who do you say that I am?" It was natural that impulsive Peter should have spoken for all: "You are the Christ (Messiah or "anointed one") "How welcome Peter's words must have been to Jesus. He had penetrated the secret; now they were ready to begin the last half of their preparation.

"And he charged them to tell no one about him"! (Mark 8:30) "But why?" the disciples must have wondered. This is the kind of news that one should shout. Why keep it a secret any longer?

For the time being at least, they have traded one mystery for another.

NOW IS THE TIME...

By Max Smith
Lancaster County Agent

To Broadcast Legume Seeds

Farmers who are going to make a spring seeding of alfalfa or clover in winter wheat should be planning for this work soon Research work along with experience indicates that late February or early March seedings have a better chance for a good stand than late March or April seedings This is with the broadcast method The seeds should be inoculated and broadcast early in the morning when the air is still and a more uniform seeding should result.

To Be Careful With Pesticides

The growing season is approaching when many supplies will be accepted and stored for later use All food and feed producers are urged to keep all types of chemicals and spray materials away from food and feed supplies, away from field and garden seeds and most important, out of the reach of children and farm animals. Pesticide safety is very important and all members of the family should be cautioned against the dangers.

To Remove Livestock From Pastures

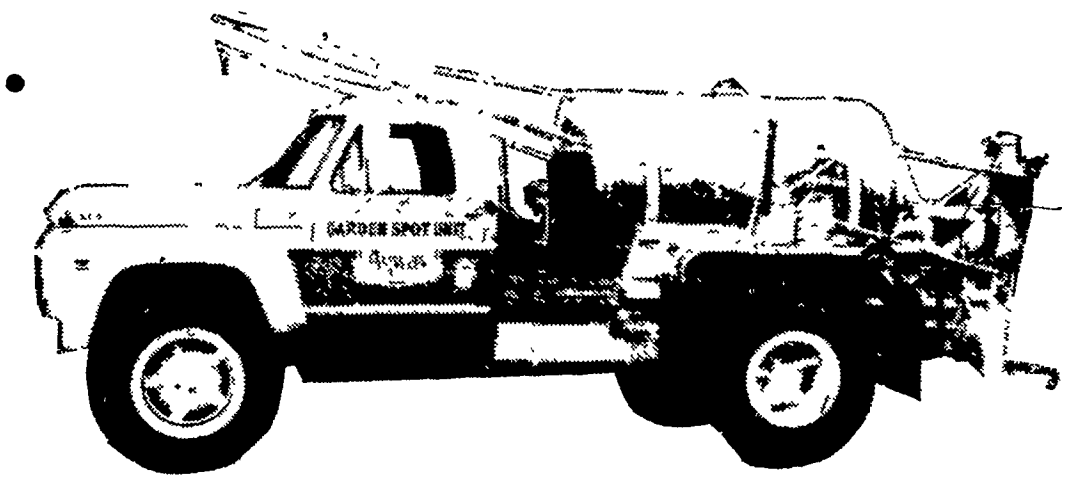
Some pastrue fields are used as exercise lots during the winter months; all of these fields become very soft and muddy during the early spring livestock should not be permitted to run over them and damage the grass roots. They will make the area very rough and decrease the grazing capacity of the area later this summer. Keep the animals confined until the frost gets out of the ground and the topsoil becomes firm, and actually producing forage growth.

AGWAY

NITAN

SOLUTION NITROGEN

Made by Agway... professionally applied by Agway



Nitan is Agway's solution nitrogen. Nitan is your least-cost source of vital early-spring plant growth when ground temperatures are still too cold for growth-producing bacteria to activate themselves. And because Nitan contains three different sources of nitrogen, it continues to boost plant growth well into the growing season.

Agway engineered and built a precision solution-nitrogen applicator to assure farmers of uniform and accurate application. It enables Agway to apply Nitan on your fields cheaper than you can buy and apply any form of nitrogen yourself.

● New Plant

(Continued from Page 1)

on its track carrying the logs over two sets of cutting knives Chips fall into a funnel and on into a fan that blows them into a waiting truck at the rate of about two tons per hour A day's output was estimated at about two tractor trailer loads

Only softwoods such as the pines can be used Oak and Hickory are not used because of slow chipping and inferior quality of the chips they produce Logs come from local sources usually within a 30 mile radius of New Holland Individual farmers and wood cutters or jobbers who make a business of cutting trees supply the input

Only straight trunks can be used No brush or branches are accepted The chipping operation utilizes all parts of the log including bark

Green chips are not stored at the yards They are placed on trucks usually within a day of delivery to insure freshness At the farm a two man team unloads the bulk trailers with mechanical equipment placing the shavings in a 1½ inch layer over the poultry house floor One man works the suction hose on the trailer and the other directs the blown shavings into place in the house

Green chips are not as dusty in the poultry operation and their moisture content provides the correct humidity conditions under the brooders in a properly ventilated environment controlled house

UNLOADING WOOD CHIPS. Leonard High works the suction hose that picks green wood shavings from the tractor-trailer to blow them into a poultry house. L. F. Photo

TURKEY CROP

Predictions for the Commonwealth's 1969 turkey crop indicate breeders will raise 1 641 000 of the big birds If the intentions materialize Pennsylvania growers will keep pace with the national trend of a forecasted 3 percent increase in production over last year

A breakdown of the state's prospective crop shows that 88 percent or 1,444,000 birds, will be heavy breeds — 5 percent more than the 1968 total Light breeds will make up the remaining 12 percent and, at 197,000 birds, will be 10 percent less than last year

The Pennsylvania Crop Reporting Service said that the number of turkeys actually raised this year may vary from present intentions contingent upon changes in market and supply conditions

Keep Tree Seedlings Moist

Tree seedlings must be kept moist from the time they leave the nursery until they are planted, says Edward P Fairand, extension forester at The Pennsylvania State University A good root system is essential to successful planting If young roots dry out rapidly they will be injured

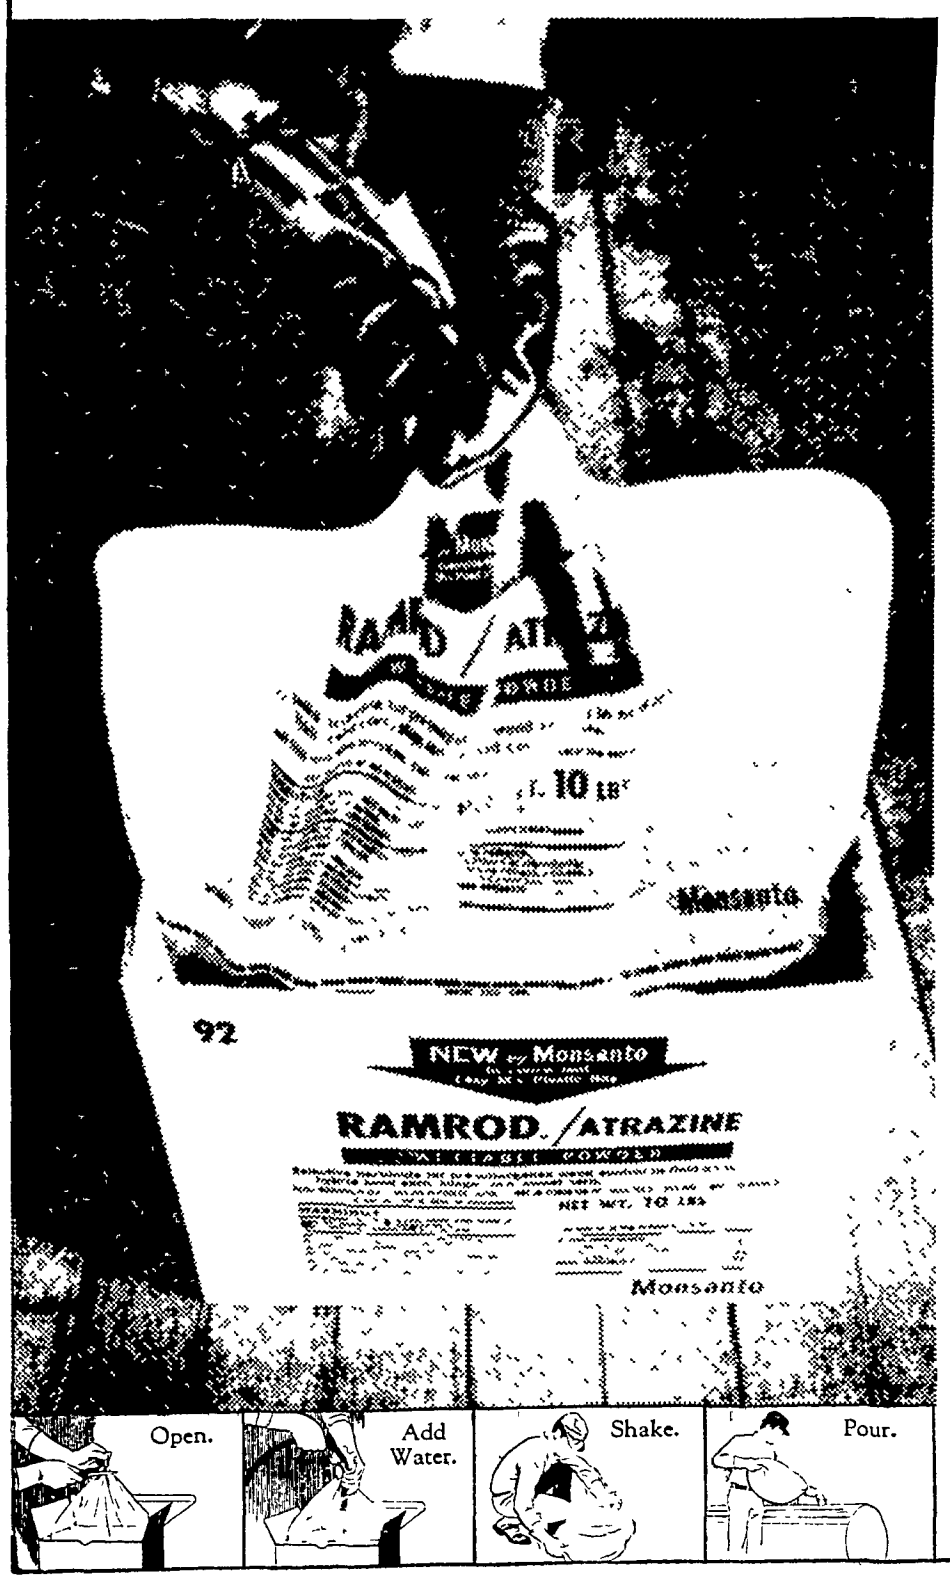
Introducing new Ramrod®/atrazine!



Two great herbicides now in one package for clean corn.
Until now, if you wanted to use a combination of Ramrod pre-emergent selective herbicide and atrazine you had to mix it yourself.
No more!
Because new Ramrod/atrazine comes in an exclusive ready-to-mix plastic bag. The mixing is confined to the bag. All you do is add water, shake, and pour into your spray tank.

Controls most weeds and minimizes carryover.
Ramrod/atrazine selective herbicide mixture gives you outstanding early-season control of every major yield-cutting grassy and broadleaf weed Control lasts longer than Ramrod by itself and the chance of atrazine carryover damage to following crops is minimized.

No incorporation and requires little moisture.
With Ramrod/atrazine you never need to incorporate. You save time and money. It's the combination you can count on to work come rain or come shine. A little moisture or a lot . . . Ramrod/atrazine stops the weeds that cut into your yields.

Now at your Farm Chemical Supplier.
Find out more about new Ramrod/atrazine. Talk things over with your supplier soon. This year go for the cleanest corn or sorghum you've ever seen . . . with new Ramrod/atrazine.

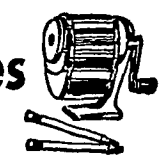
Correspondence Courses



IT'S HOME IMPROVEMENT TIME

It's Spring! Almost — and that means home improvement time Your plan may be as simple as a fresh coat of paint or as elaborate as a plan for remodeling Whatever your plans are for making home improvements, you'll want to know the right way to avoid costly mistakes

Two courses to guide you in making improvements around your home are available from The Pennsylvania State University One course titled Improving House and Grounds gives practical ideas for making homes more livable and home grounds more attractive In addition to a discussion on remodeling and lawns, efficient planning of bathroom, kitchen, and storage areas is discussed. The course sells for $2 65

The other course is House Furnishings and begins with a discussion on planning It continues with color, texture, arrangement, lighting, windows, accessories and carpets and rugs This course sells for $3 45.

If bought together, you may have both courses for $5 50 You'll want to study both courses before you begin, if you plan to redecorate, remodel, or add furnishings to your home. Make check or money order payable to The Pennsylvania State University and send to Home Improvements, Box 5000, University Park, Pennsylvania 16802.

County FFA Project Book Winners In State Contest Announced

Lancaster County F. F A. Members won 43 medals in the State Project book evaluation contests. Henry E Givler, Area Supervisor of Agriculture Education, announced the results for the county this week. He pointed out that there were less books entered from the county this year, but it produced 13 more medal winners than the previous year and 26 more than in the evaluation 2 years ago There were 1,150 record books in the contest.

Lancaster County winners are:

Beef Fattening: Jay Livengood - Manheim Central - Silver.

Dairy Calves: Tom Bollinger - Silver and Jay Zimmerman - Bronze, both from Ephrata.

Miscellaneous J. Mark Nolt - New Holland - Silver and Kenneth E. Grube - Warwick - Bronze.

Occupational Experience - Off Farm: Melvin Stoltzfus - Lampeter-Strasburg - Gold

Poultry James Esbenshade - Pequea Valley - Gold

Scrapbook: Grassland Chapter - New Holland - Silver.

Swine Breeding Steve Heishey - Pequea Valley - Bronze

Swine Fattening Clair Stauffer - Gold; Barry Grumbein - Silver, David Harting, Kenneth Sensenig, and Dennis Martin - Bronze, all from Ephrata and Dennis Hess - Warwick - Silver

Veal Calves Jay Zimmerman - Gold and Galen Hackman - Bronze, both from Ephrata

Vegetable Garden Linford Lapp - Pequea Valley - Gold

Work Experience - On Farm Joe Rineer - Solanco - Silver

2 Enterprises Gary Neff - Penn Manor - Gold, Dale Nolt - Manheim Central - Bronze; Burnell Buchen - Manheim Central - Bronze; Dean Bollinger - Warwick - Bronze, David Brandt - Manheim Central - Honorable Mention.

3 Enterprises Paul Clark - Pequea Valley - Gold, Clair Esbenshade - Lampeter-Strasburg - Silver; Marvin Glick - Solanco - Bronze; Jeffrey Pfautz - Ephrata - Bronze; Merlin Snader - New Holland - Honorable Mention.

4 Enterprises Dave Hoover - Penn Manor - Gold; Thomas Aaron - Solanco - Silver; Lloyd Welk and LeRoy Welk - Solanco - Bronze; Daniel Ressler - Penn Manor - Honorable Mention.

5 Enterprises: Dale Bollinger and Charles Smith - Solanco - Silver; Charles Hess - Penn Manor - Honorable Mention.

6 Enterprises: Earl Stauffer and Eugene Bollinger - Ephrata - Bronze; Gerald Wolfe - Manheim Central - Bronze.

7 Enterprises: Edward Donough - Manheim Central - Honorable Mention.

9 Enterprises: Lewis Kreider - Solanco Gold.

In addition, Earl Stauffer of Ephrata, placed 1st in the State in the National Dairy Products Award Contest for Efficient Milk Production

Lewis Kreider of Solanco placed 1st in the county for the Production Credit Award.

Willis Rohrer

Willis Rohrer Honored As Golden Dealer

Willis Rohrer of P L. Rohrer & Bro, Smoketown, Pa has just returned from San Francisco, California where he was an honored guest of the Ortho Division of Chevron Chemical Co.

Rohrer was selected to represent Ortho Dealers of the Northeastern United States and was one of several outstanding Agricultural Dealers throughout the country to be so honored by Ortho's Golden Dealer program at their home office in California.

● "Hippies" Prefer

(Continued from Page 1)

ies, 94 per cent said they would prefer milk if they had a choice of any drink regardless of cost "What have we done with this preference? We have thought production and not marketing," Honan said.

In the business meeting, John Harnish, Washington Boro, was announced as the first 25 year member award winner in the District #7 area New officers were also elected for each local in the district.

They are: Millersville — Andrew H Martin, Pequea, president; J Clayton Charles, Lancaster, secretary-treasurer; Jay E Landis, Lancaster, Jacob S. Ober, Conestoga, delegates; Lewis W. Shore, Wash. Boro, and John J. Hess, Wash Boro, alternate delegates, and Melvin L. Shertzer, Millersville, Lancaster Market committee.

West Lampeter Kenneth B. Garber, Willow Street, president; Jacob R. Houser, Lampeter, secretary-treasurer, John M Harnish, Henry B Leaman, both of Lancaster, delegates; Harlan N. Keener, Edwin J Landis, both of Lancaster, alternate delegates and J. Wade Groff, Lancaster, Lancaster Market committee.

Donegal Lester Hawthorne, Elizabethtown, president; John L Landis, Lancaster, secretary-treasurer; Paul N Brubaker, S. R. Shellenberger, both of Mt. Joy, delegates; Mahlon M Fry, Elizabethtown, Irwin W. Engle, Marietta, alternate delegates and Cletus A. Balmer, Manheim, Lancaster Market committee.

Lititz Clyde M. Buchen, Manheim, president; Raymond W. Burkholder, Lititz, secretary-treasurer; Carl L Martin, Ephrata, Clarence Stauffer, Ephrata, delegates; Paul K Brubaker, Manheim and Buchen, alternate delegates and Noah W. Kreider, Jr., Manheim, Lancaster Market committee

The livestock population explosion on Pennsylvania farms was rather slight last year. A January 1 inventory of all species indicated that they increased their numbers by only 2 percent for a total of 2,475,000 head However, their value rose 8 percent to $441,451,000.

All cattle and calves totaled 1,799,000 head on January 1, up 1 percent from the same date in 1968, and valued at $240,966,000.

Hogs and pigs showed the largest increase, a rise of 9 percent to 506,000. Value was placed at $17,255,000.

Continuing a long-time downward trend, sheep and lamb numbers declined by 1 percent. They numbered 170,000, but showed a value increase of 5 percent to $3,079,000

The livestock survey is made annually by the Pennsylvania Crop Reporting Service

Whenever people do mountain climbing over mole hills, ulcers are the result

WASHINGTON REPORT

Congressman Edwin D. Eshleman

16th District—Pennsylvania

Since the opening of the 90th Congress there has been a good deal of talk about electoral reform I introduced my own version for changing the Presidential selection process a couple of weeks ago. That proposal was based upon rather extensive research, and it offers the changes that appear to me to have the best chance of becoming law before the next Presidential election

After completing the research into electoral reform my staff assistant, Robert Walker, and I felt that the information we had gathered might be of some general interest We put it together in a magazine article that was published early this month in THE CHRISTIAN CENTURY magazine However, I thought that a condensation of points covered in the article would aid those of you who follow my newspaper column in understanding the multitude of problems that the Congress faces as it goes about trying to change the electoral system Therefore, this column and the one to appear in two weeks will be devoted to the subject of electoral reform

The issue is certainly not a new one for the Congress As early as 1797 an electoral revision plan was offered in the House of Representatives Since that time hardly a session of Congress has passed without the introduction of one or more pieces of legislation seeking to change or abolish the electoral college Yet during those 171 years, this nation's peculiar fashion of picking its leader has remained basically unchanged.

Under the electoral college system, the American people do not really choose their chief executive A small band of 538 independent men and women actually cast the deciding ballots This system often seems completely inadequate in the modern day, especially when the public's voice can be totally ignored But, while a wide variety of ideas have been suggested to revise the electoral college, each plan has weaknesses as well as areas of strength

Several questions must be asked about each reform proposal to determine its relative merit. Those questions include Will it make the election process more democratic? Will it eliminate the uncertainties now embodied in the election system? Will it add an element of security from possible constitutional crises arising from electoral deadlocks and the like? Can it survive the difficult and complicated process of becoming a Constitutional Amendment? Is it a better system than what we now have? My research has indicated that none of the reform plans under consideration, including the one I have submitted, can bring a yes response to each of the above questions.

One proposal that seems to have a good deal of popular appeal is called the direct election plan. Such a system would have the vote of the people be the only determining factor in the election of a President The electoral college would be totally abolished.

Direct election has numerous features to recommend it as an adequate reform measure. It would certainly add a more democratic character to the election of a President. As a matter of fact, it answers all of the basic questions pretty well except one — the most basic one

Direct election appears to have little chance of ever becoming an amendment to our Constitution The thing to be remembered is that three quarters of 38 of the fifty states must ratify a Constitutional Amendment, and in this case the small states, in particular, would have a basic reason for opposing a switch to direct election The reason is that they would tend to lose considerable influence in the whole Presidential selection process. In other words, the few electoral votes given a small state are much more influential than the total vote of its population would be, and a small state is not likely to give up this degree of power. Seventeen states stand to be affected adversely in this manner by a direct election plan, thereby putting a probable damper on the chances of such a plan finding acceptance.

I shall pick up the discussion at this point in my next column, look at some other reform ideas, and explain a little about the conclusions that I reached.

● DHIA Directors

(Continued from Page 1)

Strasburg R1, president; John Breneman Kirkwood R1, vice president; and Donald Eby, secretary Jacob Houser, Jr, and J Wilbur Houser both of Lampeter Road, were reappointed treasurer and head tester respectively

Over 1000 herds in Pennsylvania were reported on the once-a-day testing, but no number of the county herds on the new testing program was available

Robert Hess, state director, reported on central laboratory testing and announced a district meeting for DHIA directors for March 6 at the Fleetwood Grange Hall Many of the local directors expressed opposition to the central laboratory testing concept, but most seemed to believe the move is eventually inevitable

If you want a man to tell you how smart you are, first, tell him how wonderful he is. It works every time.

Dog Check Started

House-to-house checks to locate unlicensed dogs have begun in various sections of the state, the Pennsylvania Department of Agriculture has announced.

Dog law officers are concentrating their efforts in areas where records show the sale of dog licenses "are not what they should be," according to T. Luke Toomey, director of the Department's Bureau of Dog Law Enforcement

In homes where unlicensed dogs are found, charges are filed against the violators, Toomey said He said the fine and prosecution costs usually total $19 for the first offense

A rap on a door or a push on a doorbell usually brings vocal evidence that a dog is on the premises, Toomey said Neighbors are also a good source of information concerning who owns dogs in a neighborhood, he added

"This is an expensive method of trying to evade the dog law," Toomey said "After all, a dog licenses costs only $1 10 to $2 10 "

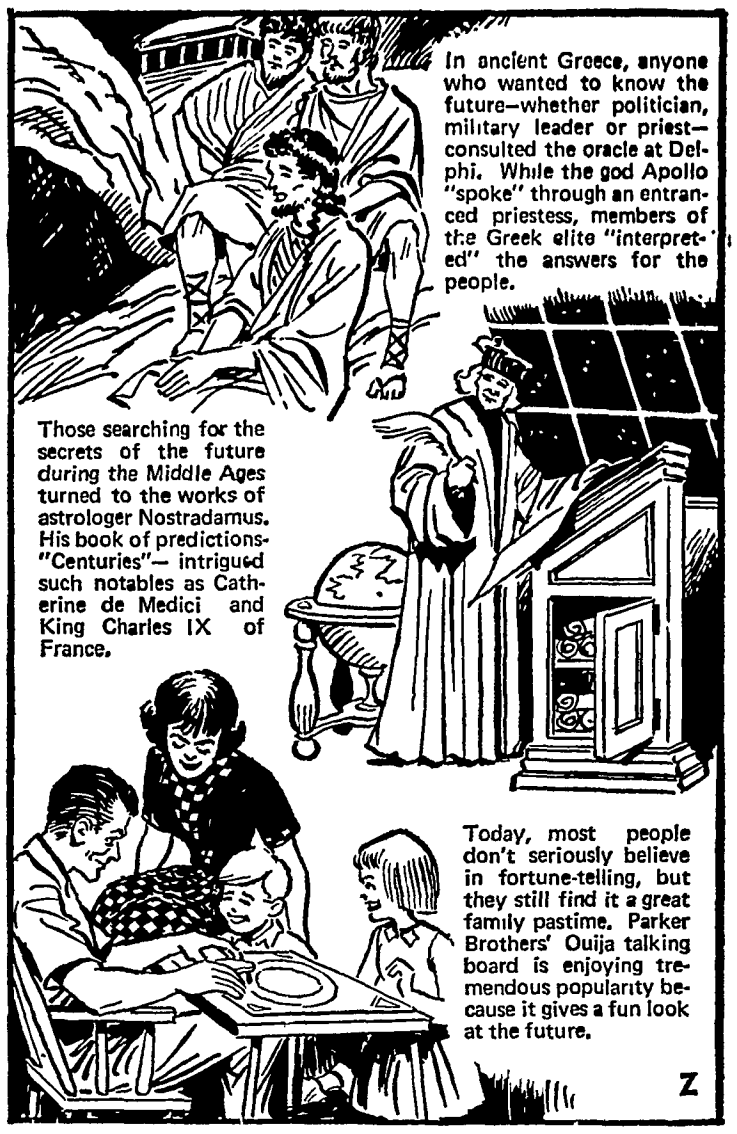
IT'S A FACT!



In ancient Greece, anyone who wanted to know the future—whether politician, military leader or priest—consulted the oracle at Delphi. While the god Apollo "spoke" through an entranced priestess, members of the Greek elite "interpreted" the answers for the people.
Those searching for the secrets of the future during the Middle Ages turned to the works of astrologer Nostradamus. His book of predictions-"Centuries"— intrigued such notables as Catherine de Medici and King Charles IX of France.
Today, most people don't seriously believe in fortune-telling, but they still find it a great family pastime. Parker Brothers' Ouija talking board is enjoying tremendous popularity because it gives a fun look at the future.

SHEEP 2 — No market test.

Prices received by Pennsylvania farmers for their products remained at the same level in January as in December, according to the State Crop Reporting Service

The average price for eggs during January was 47 cents a dozen, up two cents from a month earlier Broilers were up one cent a pound, steers up 50 cents a hundredweight, and hogs up 60 cents a cwt

Grain prices advanced slightly Corn was up four cents a bushel, wheat five cents and oats two cents

Milk prices were down 10 cents a cwt from December but up 40 cents from January 1969

NEW Purina Dairy Conditioner Special can prepare cows for good production at low cost

If you're not among the many good local dairymen who have started mixing NEW Purina Dairy Conditioner Special with your own grain to build a research-proved dry cow ration, it can pay you to check into this low-cost way of feeding dry cows.

New Purina Dairy Conditioner is a 16 percent protein ration, fortified with extra Vitamins A and D plus phosphorus to help guard against milk fever.

To help you save on dry cow feeding, Purina Research recommends varying feeding levels, depending on cow condition and the quality of your roughages. For example, if a cow is in good condition and your roughages are of excellent quality, you would feed less Purina dry cow ration than if the cow were in only fair condition and if the roughages were of only fair quality.

Using Purina Check-R-Mix* formulas we can build you a low-cost dry cow ration, combining New Purina Dairy Conditioner with your grain. Or, if you're feeding low-protein roughages, it may pay you to feed Dairy Conditioner "straight"—just as it comes from the bag.

More and more successful area dairymen are proving that good dry cow feeding pays off in extra cow condition—and extra milk production in the next lactation. For example, 100 to 200 pounds of additional body weight at freshening can pay off in 1,000 to 2,000 pounds of extra milk during the lactation.

Drop in soon and get your free copy of the Purina Dry Cow Program folder. We'll be glad to point out how new Purina Dairy Conditioner Special can help prepare your dry cows for good production at low cost.

Wilderness Road

Daniel Boone and a few companions from Fort Watauga, N.C., blazed the southern route to the west through the Cumberland Gap and into Kentucky. This Wilderness Road is now followed by the eastern branch of the Dixie Highway.

Consistent Loser

William Jennings Bryan, the "silver-tongued" orator of U S politics, was defeated in almost every office he sought. In one presidential campaign, he traveled over 18,000 miles and made 600 speeches in 27 different states.

Local Firm Receives Top Dealer Award

Farmersville Equipment Company, Inc, located at R D 2 Ephrata, Pa, was recently honored as a member of the 1968 President's Honor Council of Oliver Corporation, Chicago-based farm and contractors equipment subsidiary of White Motor Corporation.

Clydeth R Buch, manager of the firm, and his wife, Mary, represented the dealership at one of the three consecutive meetings of the Council in Cuernavaca, Mexico, Feb. 16-28.

Oliver president James D. Wormley and the manager of Oliver's sales and service branch for this region presented the local dealership with a handsome engraved plaque in recognition of its achievement. Only 200 Oliver dealers in the entire United States were so honored in 1968, a year of challenge throughout the farm equipment industry This was the third time the local firm received the award during the five years it has been established.

Selection for membership in the President's Honor Council was based on sales volume and collections in 1968 compared to 1967. Wormley noted that dealers achieving these goals in 1968 attained outstanding performances in all phases of business management.

STATE ONE ACRE CORN CHAMPION

Jesse L. Balmer, Lititz R. D. 4, won the championship of Maturity Group 4 with a yield of 217 bushels per acre growing YW 804 Single Cross (former Griffith SX 666). The yield was the highest in all state groups for the current contests. Jesse is a member of the Warwick FFA Chapter.

● Crops & Soils

(Continued from Page 1)

win a contest not trying to make the most profit

Other figures given were total cost per acre from $78 to $196 and labor and management returns from $94 to $191 "These figures don't tell you much about yourself in your own operation" he said "The major expenses are not the same for each farmer."

In figuring costs, Cooper listed fixed costs such as land, labor and management and equipment overhead (depreciation, interest housing and insurance) He also said you must also consider variable costs such as seed, lime, fertilizer, sprays, repairs, fuel, lube and custom work

"Generally the low yields make the highest cost per ton," he said, "but not always Neither does the highest bushel per acre yield produce the highest cost corn" Cooper recommended farmers to get the valuable information needed to figure their own production costs

On another subject during the day-long program, Joe McGahen, extension agronomist, said. "I would look at a new hybrid for a year or two before I went 'hog-wild' on it See if it has good standability and note how it matures"

Speaking on the subject, "Where Are We Headed in Corn Growing?", McGahen said, "The major problem in corn production is to get a hybrid that will stand and grow to maturity"

On minimum tillage, the specialist said, every trip across the field costs money "Probably the best type of seed bed would be plowed ground leveled off a little," he said. "Which way you go is up to you Even zero tillage works well if done right. Just think in dollars and cents You can kill sod with chemicals but I can kill it cheaper with a plow."

"The basis of a fertilizer program is a soil test," McGahen said "It's foolish to apply a fertilizer item if you don't need it The old idea of going by a "rule-of-thumb" is old-fashioned"

The agronomist said, "There is no question we can improve yields with narrow row spacing How narrow is a machinery problem To sacrifice a good piece of equipment to go to narrow rows is not good"

"If you go to narrow rows, you must also go to higher corn populations I don't like to go beyond 24 000 plants per acre for grain," McGahan said "I feel farmers may get carried away and plant population way way over the land productivity Eight to nine inches apart in the rows seems to be the best spacing for good yields"

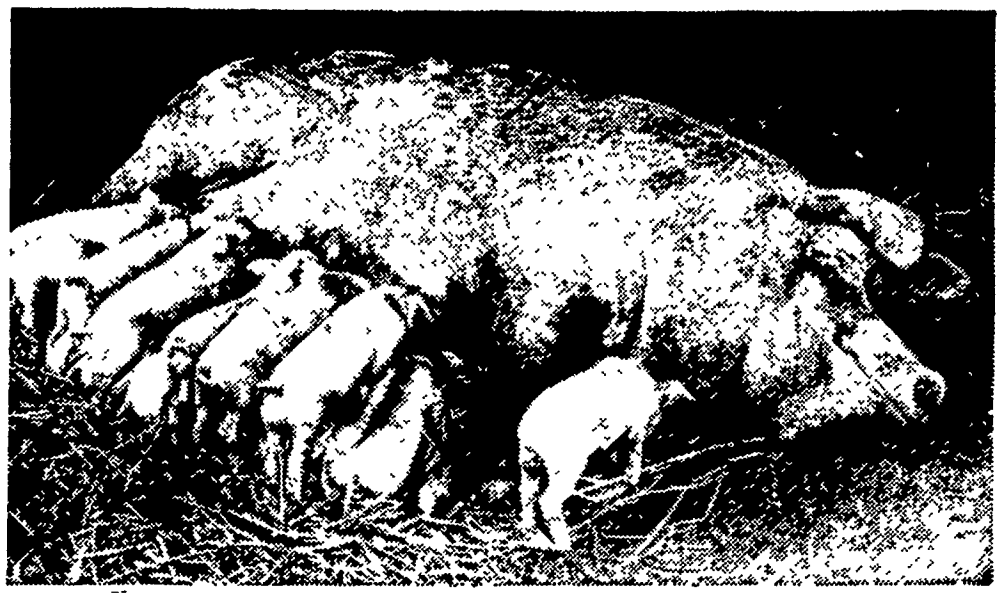
Other speakers and subjects included George Berggren, extension agronomist, "Weed Control, 1969 Style", C R Studholme, state supervisor of Wild Life Services, "Nuisance Birds" (controlling them now and in the future) and Robert Tetrault, extension entomologist, "Farm Crop Insect Control For 1969"

Arnold G Lueck, associate county agent, was in charge of the program

Mulch Strawberry Plants Soon

Extension pomologists at The Pennsylvania State University recommend placing about three inches of clean straw, hay, or other mulch over the entire strawberry bed. If you don't have enough material to cover the entire bed, just cover the rows well and leave the spaces between the rows uncovered.

READY FOR
BALANCED FEED



JUST THE FEED FOR US
PIGLETS TO GROW ON!

NO. 701 GREEN PASTURES
PIG STARTER PELLETS!

How To Use:—

Start Creep feeding No. 701 when pigs weigh 5 lbs. or are 7 days old and feed through 6th week when pigs should weigh about 35 lbs.

Amount Required

15 to 20 lbs. per pig.

Feed Per Lbs. Of Gain During This Period

1.25 to 1.50 lbs.

Field Tests Indicate:—

1. More uniformity in pigs, fewer runts.
2. More economical gains. Heavier pigs at 8 weeks.
3. Pigs may be weaned at six weeks. This gives more time for proper conditioning of sow before re-breeding.
4. Easier to maintain farrowing schedule.

MOST PALATABLE FEED WE HAVE
"Sweet as a good muffin"

If we can help you design a profitable program for your swine enterprise or aid you in problems relating to swine management or nutrition see your MILLER & BUSHONG SERVICE Representative or call us direct at Lancaster 392-2145.

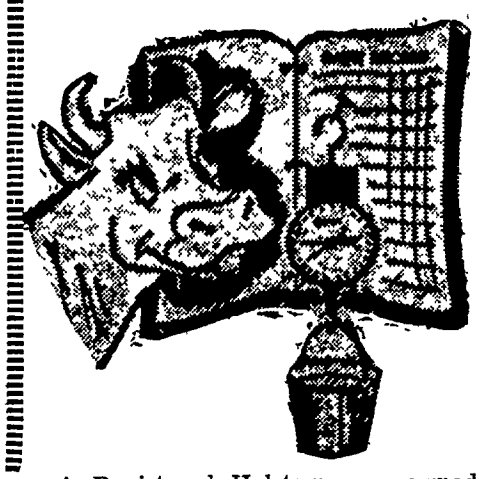
SECOND SECTION



LANCASTER COUNTY DHIA MONTHLY REPORT

A Registered Holstein cow owned by Garry G Kreider, Quarryville R1, completed the highest 305 day lactation in January according to the latest Red Rose DHIA monthly report Clover produced 21,665 pounds of milk, 979 pounds of butterfat with a 4.5 percent test Second high lactation was completed by a Reistered Holstein cow owned by J. Mowery Frey Jr., 401 Beaver Valley Pike, Lancaster. Hilda produced 22,407 pounds of milk, 884 pounds of butterfat with a 3 9 percent test in 305 days

The herd of David S. Lapp, Gordonville R1, had the highest daily butterfat average This herd of 26 0 Registered & Grade Holstein cows averaged 58.4 lbs of milk, 2 21 lbs of butterfat with a 3 8% test The herd of J. Z. Nolt, Leola R1, placed second This herd of 35 7 Registered Holstein & Grade Holstein cows averaged 54.1 lbs. of milk, 2.11 lbs. of butterfat with a 3 9% test

Facts Dairymen Should Know

By Victor Plastow
Associate Agricultural Agent

Please reserve the date of March 11, 1969 because that is "DAIRY DAY". This event will be held at our new Farm and Home Center in the large auditorium starting at 9 00 a m and continuing through until 3·00 p m The speakers will be as follows: Dr. Samuel Guss — "Herd Health Problems Related to Mastitis"; Dr. William Pierce — "Dairy Outlook"; Henry R. Geisinger—"If the Cow Only Knew"; Herbert Gilmore — "Latest Changes in the D H I A. Program"; Dr Sam Guss— "Herd Health Problems Relating to Breeding." The program will feature a milk promotional film by the Atlantic Dairy Association We will again have several exhibits on display of related dairy interest

* * * *

Now is the time to check your ventilation system in the dairy stable. Almost one-fourth of the milk samples purchased from retail outlets in recent months had definite feed tastes This off flavor can be eliminated by feeding silage after milking and having adequate ventilation in housing areas.

* * * *

Feed supplemental vitamin E to your cows, if the milk develops a cardboard like (oxidized) taste. Stored feeds contain very little vitamin E, which permits this flavor development in milk, especially during February, March and April. Within 10 days after cows receive green feed, correction is achieved. Amounts to feed vary from 500 to 1000 I.U. per cow daily.

* * * *

For the milk juggers, producers and retailers of the dairy industry, a dairy processor's conference, consisting of a series of 4 meetings, will be held in the new Farm and Home Center starting on Thursday, March 27th and on each succeeding Thursday for 4 weeks. Topics to be covered include Processing Flavor, Quality, Cleaning and Sanitizing and a question and answer session.

Interest in free stall loose housing for dairy cows continues to dominate the farm building field. Many dairymen are building new systems, moving away from the old barn When you consider remodeling for 100 cows or more, the old barn is probably a very small part of the finished system, but its use may severely limit the choices of equipment and layout If you can get the kind of feeding and cow handling you want with the old barn, then use it But if it makes you go to a second rate plan, then forget it for cows. Maybe you can adapt it for heifers, calves and maternity pens. Also, be sure you pick a plan and a building site that will allow expansion of the herd. Remember, there is more than one way to get big in the dairy busi-

FOR THE
FARM WIFE AND FAMILY

Serve Potatoes Many Ways

by Mrs. Richard C. Spence

There's always a new way to serve potatoes that adds appetite to meals They're plentiful now and many markets have thrifty price specials.

Scalloped Potatoes and Franks make a hearty casserole that has the double advantage of being easy and inexpensive Its most unique feature is a creamy sauce made with Swiss cheese which is poured over the top and permeates the whole dish with mellow flavor

SCALLOPED POTATOES 'N' FRANKS

- 8 frankfurters
- 3 tablespoons butter
- 1½ cups chopped onions
- ¼ cup regular all-purpose flour
- 1½ teaspoons salt
- ⅛ teaspoon pepper
- ⅛ teaspoon paprika
- 2 cups milk
- 1 cup (4 ounces) shredded Swiss cheese
- 2 tablespoons chopped parsley
- 5 cups thinly sliced baking potatoes (about 3-4 medium)

Set aside one frankfurter for garnish; cut remainder into thin slices In a 2-quart saucepan melt butter; saute onions until tender Stir in flour, salt, pepper and paprika Remove from heat, gradually stir in milk Cook over medium heat, stirring constantly, until thickened Cook 2 additional minutes Remove from heat; stir in cheese and parsley until cheese is melted If necessary return to low heat to finish melting cheese (Do not boil) Layer one-half of potatoes into a buttered 2-quart casserole; pour on one-half of cheese sauce Place all of sliced frankfurters over sauce, repeat with remaining potatoes and sauce Cover and bake in preheated 350 degree oven for 1 hour Remove cover, slice remaining whole frankfurter and place on top. Bake uncovered 15 30 additional minutes or until potatoes are tender Serves 6 8.

Here's an interesting recipe that's different —

POTATO PATTIES

- 1½ pounds potatoes (about 6 medium)
- 2 tablespoons finely chopped onions
- 2 tablespoons chopped parsley
- 2 tablespoons flour
- 1 teaspoon salt
- 3 tablespoons fat or oil

Parboil potatoes in their skins until partly cooked, but still hard in center — 15 to 30 minutes Cool under cold running water. Peel potatoes; shred with a coarse grater. Toss shredded potatoes, onion, prsley, flour, and salt in a large bowl, using two forks. Shape into ½ cup patties Brown patties in hot fat, about 5 minutes on each side. Calories per serving. About 160. Makes 6 servings.

For extra variety try chive potato patties Use fresh or frozen chopped chives in place of parsley.

* * *

CHICKEN BREAST SPECIAL

- 6 chicken half-breasts
- 1½ teaspoons salt
- ⅛ teaspoon pepper
- ¼ teaspoon paprika
- ¾ cup fine dry breadcrumbs
- 2 eggs, slightly beaten
- 1 to 3 tablespoons fat or oil, as needed
- ½ cup water
- 1 can (10½ ounces) condensed cream of chicken soup
- 1½ cups thinly sliced carrots
- 2 cups potatoes, cut in julienne strips
- ¾ cup celery cut in ½ inch slices

Season chicken with salt, pepper, and paprika. Roll chicken in breadcrumbs Dip chicken into eggs, then roll in crumbs again Brown chicken slowly in hot fat until golden brown. Add water, cover, and cook over low heat about 30 minutes, or until chicken is almost tender.

Remove chicken and keep warm Add chicken soup to the pan in which the chicken was cooked Add vegetables, and place chicken pieces on top Cover Simmer gently about 20 minutes, or until chicken and vegetables are tender. Calories per serving About 365. Makes 6 servings

Menu Suggestions: Serve with cole slaw and cheese breadsticks. Have fruit for dessert.

* * *

SAUSAGE AND POTATOES AU GRATIN

- 1 can (10½ ounces) condensed cream of mushroom soup
- ½ cup milk
- ½ cup finely chopped onion
- ¼ cup chopped green pepper
- 1 tablespoon chopped pimiento
- ½ teaspoon salt
- ¼ teaspoon pepper
- 4 cups thinly sliced potatoes
- 1 package (8 ounces) precooked small smoked sausage, cut in bitesize pieces
- 1 tablespoon butter or margarine
- ½ cup shredded Cheddar cheese

Combine soup, milk, onion, green pepper, pimiento, salt and pepper; blend well Place half the potatoes in a greased 2-quart casserole. Add half the sausage Cover with half the soup mixture. Repeat layers Dot with fat. Cover and bake at 350 degrees about 1¼ hours. Remove cover. Sprinkle with cheese and bake, uncovered, 15 minutes more, or until potatoes are tender. 6 servings.

* * *

BEAN CHOWDER

- ¾ cup dry pea beans
- 3 cups water
- 1½ teaspoons salt
- ¾ cup potato, diced
- ½ cup onion, chopped
- 1½ teaspoons flour
- 1 tablespoon butter, margarine, or drippings
- ¾ cup tomatoes, cooked or canned
- ⅓ cup green pepper, shredded
- 1½ cups milk

Boil beans 2 minutes, remove from heat, soak 1 hour, and then cook. Add salt. Boil, covered, until almost done, about 1 hour. Add potato and onion; cook 30 minutes more. Mix flour with the fat. Stir into bean mixture. Add tomatoes and green pepper. Cook over low heat 10 minutes, stirring constantly until thickened, then occasionally to avoid scorching.

FARM WOMEN NEWS

SOCIETY 8

Society of Farm Women 8 met last Saturday at St. Mark's United Methodist Church, Mount Joy. Mrs. William Heisey presided. Ruth Eby led the devotions.

Roll Call was answered by naming "My Favorite First Lady." A new member, Mary Grace Martin, was installed by the president.

Members voted to give a donation to the county project, Halfway House.

Plans were made for the spring rally, set for May 15 at the Town and Country.

The next meeting will be held March 15 at the Maytown Fire Hall, when husbands of the members will be the special guests.

SOCIETY 22

Mr. Robert Millard was guest speaker at a recent meeting of Society of Farm Women 22 held in the home of Mrs. Richard Forry, Horseshoe Road, assisted by Mrs Kenneth Hoover.

Mrs. Paul Miller presided Mrs. Clair Witmer, Lampeter, was installed as a new member.

The club approved a gift of $25 to be forwarded to the County Farm Women treasurer, Mrs. Abram Weidman, to be credited to the County project, Halfway House. The county gift will be presented in October following a tally of gifts from the local societies.

Members were given envelopes with the farm women emblem in which the individual members are requested to enclose a letter to Governor Raymond Shafer, Representatives Sherman L. Hill and Marvin Miller, and State Senator Richard Snyder to express their views on supporting legislation on the resolutions adopted by the Pennsylvania Society of Farm Women at the recent convention in Harrisburg. The resolutions deal with opposition to the liberalization of liquor laws, preservation of natural resources, Bible reading in public schools and partriotism.

In other business, plans were made for a household sale which will be held March 8 at 10 a m on Hans Herr Drive at the residence of Mrs Maud Ranck. The society will be in charge of a refreshment stand.

The next meeting will be held March 11 in the Fellowship Hall of the Covenant United Methodist Church, W. Orange and Mulberry Sts, Lancaster Charcoal drawing will be featured by Elwood Mehle. Society 25 will be special guests.

After the meeting, "sweet swap" refreshments were served

SOCIETY 18

Society of Farm Women 18 met last Saturday at the home of Mrs David Rohrer, 142 Main St., Landisville. Mrs Lewis Mengel was in charge of devotions.

Mrs. Edward Wissler, president, conducted the business meeting.

It was voted to donate $75 to the Farm and Home Center. Society 18 will sew at the General Hospital on Thursday, March 6.

Miss Lois Rohrer entertained the group on the marimbas Mrs Martha Greenwalt spoke to the women on how to remodel old furs.

Society 18 will entertain Society 21 in March at the Farm and Home Center.

SOCIETY 15

The Society of Farm Women 15 met last Thursday at the home of Mrs. William Crawford. She was assisted in entertaining by Mrs. John Frantz, Mrs. Clair Sticher and Mrs. Wiley Howett

The business meeting was conducted by the vice president, Mrs. Leigh Walton

The program featured highlights of the recent state convention in Harrisburg by Mrs Thomas Greenwalt Mrs Martin

Ladies, Have You Heard? . . .

By Doris Thomas, Extension Home Economist

Good Care Helps Cut Clothing Bill

If every family members develops good clothing care habits, his garments will give the maximum wear. And everyone can help to cut the clothing bill. Some ways to do it include

THOMAS

Put a garment on a padded or shaped hanger after each wearing Close the zippers and buttons. If belts seem to pull the waist out of shape, hang them separately

Brushing and airing garments regularly will give added wear. Use a soft clothes brush and brush with the grain of the fabric Wool clothing needs to be aired and brushed more often than clothing of other fibers. For both appearance and wear. Keep the wrinkles steamed out of clothing

Develop the habit of keeping clothing free of spots and stains. After each wearing check a garment to see if there are spots, and remove them at once. When you're traveling it's a good idea to carry a spot removal pad or stick so you can remove spots while they're fresh.

Plan to launder or dryclean clothing frequently so that heavy soil doesn't develop. Less treatment is needed for slightly soiled garments.

Keep clothes mended — catching the small seam break before it enlarges and splits the fabric not only saves time on your part but adds to the wearability of the garment

Care of Eggs

To maintain their high quality, keep eggs cold at all times before using.

Buy eggs that are kept in a refrigerated case take eggs home promptly, and put in your refrigerator at once

Because eggs absorb odors easily, keep eggs away from foods with strong odors

If an egg needs washing, wash it just before using.

Before storing, check cartons for any eggs with cracked shells. If you find some, use these first.

What Is Freeze-Dried Food?

Freeze-dried foods are foods that have had the moisture taken out while the food is frozen.

● Farm Women

(Continued from Page 19)

Greenleaf, state secretary, gave members a quiz on the by-laws

The next meeting will be held at the home of Mrs Edwain Witmer, Quarryville, on March 20

SOCIETY 5

Jack Sippel presented an illustrated talk on Camp Easter Seal at a meeting of the Society of Farm Women 5 (East Petersburg); last Saturday at the Evans Restaurant in Manheim

Miss Matilda Workman and the president, Miss Elizabeth Workman, were hostesses During the informal business meeting, Mrs Bessie Graybill reported the success of a refreshment stand held recently at Mrs. Ed Longenecker's household sale

Mrs Abram Weidman, bus trip chairman, discussed tentative plans for a trip to Hess Brothers Flower Show in Allentown and the Sterling Gardens. She will check into both possibilities and advise the club at the next meeting which will be held March 29 in the East Petersburg Church of the Brethren instead of the home of the hostess Mrs. Paul Ebersole as previously announced.

The Rev. and Mrs Roy Forney will present the program

SOCIETY 29

First Aid in the Farm Home was the topic of discussion and demonstration by Mrs Robert Mowrer when the recently organized Society of Farm Women 29 met Monday evening in the home of Mrs Clayton Ranck, Marietta R1, with Mrs John E. Hiestand as co-hostess

Mrs Paul Witman, past county president, installed the new members, which included all but the 10 charter members The group was led in the opening and devotions by Mrs. Gerald Ruhl.

During the business session in charge of the president, Mrs. Ronald Ober, the group decided to limit membership to 29 women. Plans to sew cancer pads were made for March 4 at the home of Mrs. Jay Bixler for the afternoon participants and at the home of Mrs Keith Vogt, in evening both located at Marietta R1.

A bake sale to be held at Two Guys on March 21 was announced by Mrs J. Stanley Newcomer, Ways and Means chairman

The next meeting of Society 29 will be held March 17 in the home of Mrs. Walter Mowrer, Columbia R1, when Mrs. Aldus Baum, Manheim, will discuss decorating Easter eggs.

SOCIETY 3

John S Garman, past president of the Ephrata Toastmasters Club, was guest speaker at a recent meeting of the Society of Farm Women 3, held at the home of Mrs Gilbert Paul, Stevens R1, near Mt Airy.

● For The Farm Wife

(Continued from Page 18)

Stir in the milk. Heat to serving temperature. Makes 6 servings About 175 calories per serving

* * * *

POTATO AND SPINACH SOUP

- ¼ cup chopped onion
- 2 tablespoons butter
- 3 cups water
- 1 teaspoon salt
- 2 cups raw, peeled, diced potatoes
- 2 cups chopped fresh spinach
- 1⅔ cups (1 tall can) evaporated milk
- 1 teaspoon Worcestershire sauce
- ¼ teaspoon momosodium glutamate

In a large saucepan saute onion in butter until transparent. Add water, salt, potatoes and spinach. Cook until potatoes are tender, about 20 minutes Add remaining ingredients and heat thoroughly but do not boil Serve with shredded Cheddar, Provolone or Parmesan cheese for topping. Makes 6 servings.

Ground Beef or Chuck?

Ground beef may contain fresh ground beef and up to 30 percent fat, according to Pennsylvania law, says Harold Neigh, Penn State extension consumer economics specialist. However, ground chuck must be fresh meat from the chuck and cannot contain more fatty tissue than is normally expected in the meat from which it was prepared. Most ground beef is from trimmings plus froben boneless beef that may be domestic cow beef or imported beef. Most consumers could not afford ground beef if it had to be entirely from steer beef.

● Facts

(Continued from Page 17)

ness. Usually this is done by putting on more cows but sometimes the size outgrows the dairymen's management ability, so his income may fall. This farmer would do better to limit the size of herd and do a better job with fewer cows. Pehaps he is the one who should remodel the old barn to keep costs down.

GRANGE NEWS

J. Luther Snyder of Camp Hill, Secretary of the Pennsylvania State Grange, was the speaker at the February 24 meeting of Fulton Grange #66 held in their hall at Oakryn. He told why the founders of the Grange over 100 years ago had selected the various officers, what a legislative force the Grange is and has been over the past century, how the Grange meets the needs of rural people and is a leader in the field of community service. He stressed the importance of good ritualism and explained proper procedure for some of the Grange's ritualistic work.

Mrs. Jesse Wood, Lecturer, presented the program, the theme being "Ritualism." She conducted a true and false quiz on ritualism with all the members participating and a vocal quartette composed of Mrs. Virginia Beck, Mrs. Charles McSparran, Gyles Brown and J. Robert Reed sang with Miss Mary Lou Wesley the accompanist. Remarks were given by Mrs. J. Luther Snyder, a member of Valley Grange in York County.

Fulton Grange will participate in the National Grange March Membership Campaign with an organization of area captains and committees functioning under the leadership of their membership committee: Mr. & Mrs. Chester Todd Jr., Mrs. Elwood Barnes, Mrs. Richard Hanks, Dennis Carroll and Mrs. Virginia Beck. They will also be in charge of the program at the next meeting March 10. The area captains will make progress reports.

The Junior Grange Marton, Mrs. Jacob Fantom, reported 5200 pounds of paper sold in tneir scrap drive Feb. 10. They are preparing for a spring bazaar and a bake sale, the proceeds of which will be used to send the members to Junior Grange Camp this summer. Their next meeting will be March 10.

The Youth Committee reported 23 went on the Peach Bottom Atomic Plant tour Feb. 12, 62 went on the Chrysler Plant tour Feb. 18 and 60 attended the youth dance Feb. 15. They plan to have some attend Youth Camp this summer. Fulton Grange will be host to District #10 Youth Conference March 15 from 9 a.m. to 3:30 p.m. All Grange youth members from Berks, Bucks, Chester, Delaware, Lancaster, Lebanon and Montgomery counties are invited. Kenneth Schlegel of Fleetwood, Berks County is chairman of District #10.

The Women's Activities Committee will have a refreshment stand at the Landis Weaver sale March 19. They will also be in charge of the Grange's annual turkey supper April 12. The Grange voted to purchase new formica-top tables to use for the supper.

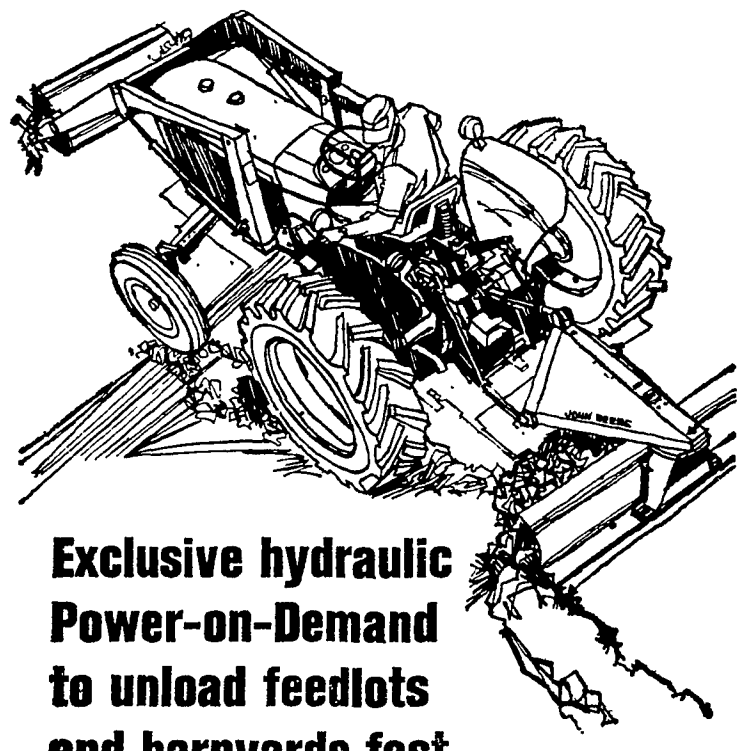
Pick a John Deere 38 h.p. 1020 as your haymaker, get this bonus...



Exclusive hydraulic Power-on-Demand to unload feedlots and barnyards fast

A package of big-tractor features . . . wrapped up in a compact, two-ton tractor design . . . that's the "1020." For haying, it provides well-spaced travel speeds ranging from 1.3 mph in 1st gear to 7 mph in 6th. It delivers "live" PTO power through midpoint and rear PTO outlets to drive a full lineup of hay tools. For loading chores, the "1020" generates hydraulic Power-on-Demand to lift a 1/2-ton bucket load . . . and provides "floating" hitch control over rear blade. Be our guest for an on-your-farm test. Credit? You bet.

ADULT FARMER MEETING ON MARCH 5

The sixth in a series of educational meetings is scheduled at 7:30 p.m. Wednesday, March 5, at the Lincoln Independent School building near Martindale. Mr. James B. Stere, Marketing Research Engineer of the New Holland Division of Sperry Rand, will be the guest speaker on the topic of the Economics of Forage Feeding to Livestock.

Mr. Stere will include a slide presentation to illustrate the program and include the discussion areas of TDN and protein values, silages and silos, feeding urea in your feeding program, forages vs. concentrates, ear corn vs. corn silage, getting the maximum from your acreage and the future of forage production.

The meeting is part of the Eastern Lancaster County Adult Farmer Program series and is open to the public.

● Farm Women

(Continued from Page 20)

Garman spoke on "The History of Mt. Zion Cemetery and the Famous Historical Monument." The monument was erected in 1901-1902 in commemoration of the soliders of the Revolutionary War who lost their lives in the battle of Brandywine in 1777.

During the business meeting, conducted by president Mrs. Willie D. Stober, it was decided to continue the scholarship fund in 1969 under the chairmanship of Mrs. Robert Gregory.

Four members of the society have signed for Volunteer service at the Ephrata Community Hospital.

On March 17, there will be a trip to Harrisburg to visit the William Penn Museum. Following this, the women will tour the capitol as guests of Representative Harry H. Gring.

It was voted to give a donation to the Farm and Home Building.

The next meeting will be held March 15 in the Coleman Chapel in Brickerville. Mrs. Esther Petticoffer will be hostess.

● Have You Heard

(Continued from Page 19)

To be freeze-dried the food is first processed, then quick frozen. The moisture level is reduced in a process that may require from six to 22 hours.

When properly packaged, freeze-dried foods store well at room temperature for as long as two years.

Freeze-dried products are packaged in jars, cans, laminated plastic, or foil.

The packages must be air tight and contain a small amount of nitrogen to keep the color and flavor of the product.

Freeze-dried foods reconstitute easily — once re-hydrated they return to looking much like their normal apperance and ready to cook or be eaten.

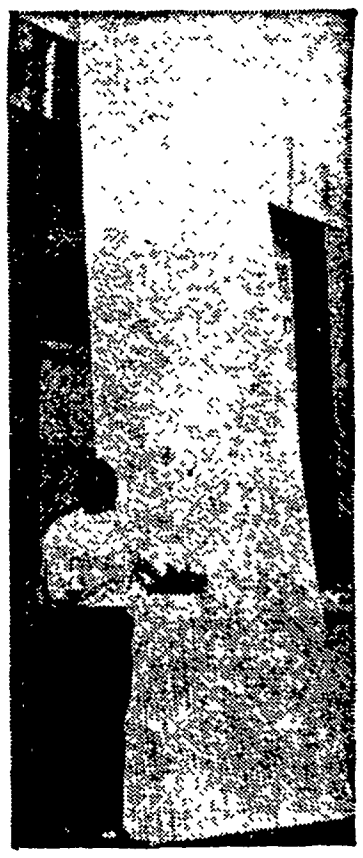
METAL ROOFING by FABRAL



THE MOST COMPLETE METAL ROOFING LINE AVAILABLE ANYWHERE!

- Aluminum
- Galvanized Steel
- Factory Painted Aluminum
- Factory Painted Galvanized Steel
- Long Lengths up to 40'
- Customer Lengths You name the length

Now Fabral Metal Roofing is available in your area. For the first time you can specify the configuration, (choice of 7 available), and type of metal (aluminum, galvanized steel, factory painted aluminum, factory painted galvanized steel - even stainless steel). You can even specify the EXACT CUSTOM LENGTH (up to 40' long) tailored to YOUR job in most of these designs. In most cases, one piece of metal roofing will run from the peak of the roof down to the eave. No end laps to cause leakage - fewer sheets - less cutting and fitting on the job. The Fabral program saves on-site labor and gives you a neater, stronger and better building.

There are Fabral metal roofing sheets designed to fit your requirements for farm, industrial, commercial, utility and general purpose structures. Whether you are building a new structure or recovering an old one, you owe it to yourself to find out about Fabral Metal Roofing - the most complete line available - ANYWHERE!

Larry Weaver Elected Pres. Of GSYF

The Annual Banquet of the Garden Spot Young Farmers Association was held last Friday evening at the Blue Ball Fire Hall. Awards for outstanding Farm Production in the local unit were given. Officers were elected and two certificates of appreciation presented

Recipients of the certificates were: Orval Bass, Lancaster County Soil Conservation Service and Reuben Hess, New Holland Branch of Agway, Inc.

In corn grain production, Andrew Stoltzfus was first with 197 bushels per acre, followed by Ivan Yost, Clyde Martin, Loren Zimmerman and Larry Weaver. Weaver also topped the corn silage content with 30 tons per acre yielding 18,290 pounds of T D N. He was followed by John C. Campbell, Ivan Yost, Eugene Eberly and Clyde Martin.

In the election of officers, Larry Weaver was named president, Loren Zimmerman, vice president, John Yost, secretary, John C. Campbell, public relations. Dale Herr, treasurer, Kenneth Martin member-at-large and Robert Martin was the master of ceremonies and Grant Heilman presented slides on Farming in the United States.

CERTIFICATES OF APPRECIATION were presented at the Garden Spot Young Farmer Annual Meeting held last Friday night at the Blue Ball Fire Hall. (left to right) Orval Bass, Lancaster County Soil Conservation Service and Reuben Hess, New Holland Branch of Agway, Inc. Robert Martin, President, was the toastmaster and Donald Robinson, Vo-Ag teacher, is in charge of the Young Farmer Program at Garden Spot. L. F. Photo

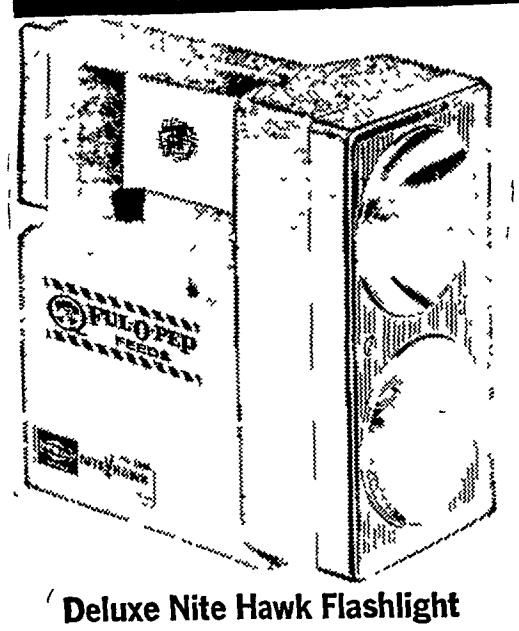
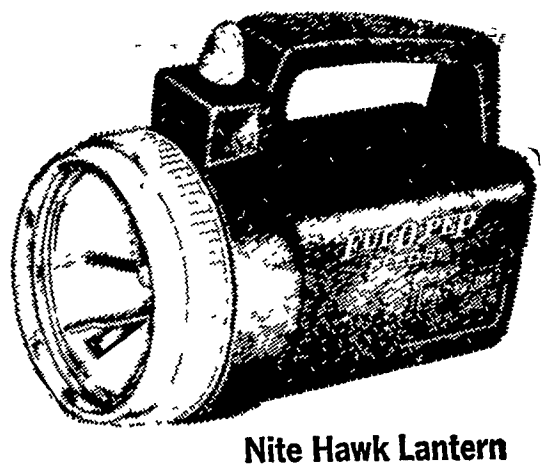
GET ON THE BEAM!

Get a Free Nite Hawk Flashlight
with your purchase of selected Ful-O-Pep Feeds



Deluxe Nite Hawk Flashlight

Ful-O-Pep's new dual beam lantern is the most versatile ever offered. It features the right light for every application. A brilliant spot beam concentrates light where you want it. The flood beam evenly diffuses light over large areas without bright spots or harsh shadows. A handy red flasher is a safety warning signal you can't miss. All three lights are dramatically combined in one break-resistant, rustproof case. Each lantern comes with battery included.



Nite Hawk Lantern

Ful-O-Pep's new economy lantern sheds just the right amount of light for any occasion. This sturdy all-purpose lantern is formed from high density polyethylene that will not rust nor break. It features a weatherproof switch, spring-cushion bulb, quick-connect battery leads, and a 3 inch vacuum aluminized reflector for perfect spot. The lantern is completely buoyant—it will not sink in water. Each lantern comes with battery included.

Alfalfa - Clover

The time for broadcasting alfalfa or clover seed on top of winter wheat is approaching, some growers will make a split seeding, one application the last week in February and the other half of the seed the first week in March, this increases the chances of getting good coverage of the seeds The important thing is to broadcast good quality seeds and do it by the middle of March Growers using their own seed should have it tested for weeds and impurities at the Department of Agriculture at Harrisburg A quick test has been developed for growers using their own seed It is unlawful to sell untested seed in Pennsylvania. Certified seed reduces the risk and insures a better crop.

4-H Club Activities

Northern Lanc. Co. Soil & Water Club

The Northern Lancaster Co. Soil and Water Conservation Club met in the basement of the Hinkletown Church on Feb 21, at 7 30 The meeting was called to order by Clark Stauffer, President.

The club decided to give $100 00 to the Farm and Home Center

Mary Ann Weaver was elected secretary when Lucy Weaver announced her resignation She could no longer attend the meetings.

Jay Irwin showed the club a film called "The Renaissance of a River". The film showed steps being taken to conserve the purity of the Susquehanna River.

The meeting was adjourned at 9 00.

SOUTHERN LANC. CO. SOIL & WATER CONSERVATION

The third meeting of the Southern Lancaster County Soil and Water Conservation 4-H Club was held recently. Jay Irvin, associate county agent, showed a film and Paul Schwing related how he won in an essay contest Vincent Hoover, club leader, also spoke to the group

The next meeting will be held at the Rawlinsville Fire Hall A demonstration on fire equipment will be given.

THE BROKEN BIT

The Broken Bit 4-H Club met at the home of Mr & Mrs Chester E Immel Jr ; R D 3, Lititz, Pa ; Friday, February 21.

A demonstration was given by Natalie Immel on telling the age of a horse by the teeth

Mrs Charles Risser, the club leader, distributed contestant entry blanks on judging horses

Two movies were shown on rodeos — Calgary Stampede in Canada, and Indian Days

Late April or early May a tour is planned of Standardbred Stables at Hanover, Pa

Any boys or girls in northern Lancaster County between the ages (current year) 10-19 are eligible to join the club and if interested may call the leader, Mrs Charles Risser

Deserts in Australia cover one third of its area — second in size only to Sahara

A BAG WITH A PURPOSE for a lady who needs portable space. This tote is generously sized inside, gaily designed outside. It is made of colored burlap with contrasting fabric lining. The embroidered flowers and border motif are worked in bright shades of knitting worsted. Two wooden hangers are used for handles. The pattern also includes a clutch bag. Free instructions are available by sending a self-addressed, stamped envelope to the Needlework Editor of this newspaper along with your request for Leaflet PE 3366-7.

Sin to a teen-ager is often only experience to their parents.

A View From The Governor's Office

By Gov. Raymond P. Shafer

Times have changed dramatically since President Teddy Roosevelt issued invitations convening the first White House Conference on Children and Youth, held in Washington in 1910, and having as its vital concern The Care of Dependent Children.

Traditionally, the purpose of the conference, held once a decade, has been to review progress for children and youth over the past decade and to set new goals for the next one based on changing national conditions and advancements in knowledge and current issues. The emphasis in Pennsylvania in preparation for the 1970 conference is the study of the educational system, the home and peer group values as related to young people.

Pennsylvania is now preparing at the grass roots level to make a major contribution to this conference through the participation of hundreds of people in a program sponsored by the Governor's Office. We are particularly fortunate in having as Chairman of the Committee on Children and Youth a man of outstanding stature, Max Rosenn, Wilkes-Barre attorney and former Secretary of Public Welfare The Committee is a unit of the Governor's Council for Human Services.

During Mr Rosenn's tenure as Secretary of the Public Welfare Department (March 1966-June 1967) many advances were made in the State's Children and Youth program such as the statewide Neighborhood Youth Corps project, the State's first day treatment center for rehabilitating adjudicated juvenile delinquents in Philadelphia, plans for improved youth development centers, and improvement of child welfare subsides to counties.

County Committees on Children and Youth have to date been organized in 63 of the 67 counties. Each county will have an adult and a youth co-chairman and will be comprised of 35 to 50 percent youth membership.

Involvement of youth and adults working together can change attitudes, shift priorities and dramatize effective service in a climate of cooperation.

Significant results of past White House Conferences have included the creation of the Federal Children's Bureau, enactment of improved child labor laws, development of a Federal-State program for maternal and child health services and Federal aid to education.

The results of the current State studies will be collated into six regional reports and further developed into a State report to be reviewed at the Pennsylvania Conference on Children and Youth to be held in Harrisburg, October 7, 1969, at the Zembo Mosque. The national conference is sheduled for February 15-21, 1970, in Washington.

As a leader among the states, I am confident that Pennsylvania will play a major role in this national conference through development of an outstanding report and the aggressive presentation of its recommendations to the President.

I hope that all young people throughout the State participate in this meaningful forum and to help develop the recommendations on what must be done to ensure proper fulfillment of the needs of youth in the space age.

Maine fishermen catch about 2 pounds of seafood for every person living in the United States, in the average year.

"REFLECTIONS" OF 1968

COCALICO 'REFLECTION' ROSE

An Excellent Cow (EX-90) Owned By
Paul B. Zimmerman - Ephrata #1, Pa.

HER RECORD

5-11	359 d	23872 M	1016 F
4-10	365 d	20293 M	848 F
3- 8	338 d	15864 M	639 F

ZIMMERMAN HERD LACTATION AVERAGE 4-68
18,372 LBS. MILK 707 LBS. FAT 3.8 TEST

We talk about herd averages and what they mean, or what their worth is. Can one measure the value of offspring in **just** dollars and cents? When a herd produces and reproduces and the herd average goes up every year the profit goes up and so does the value of the herd.

Paul B. Zimmerman was given an award for the highest classified in Pa. (105.6% BAA) for 30 to 50 cows. Pauls' herd was chosen **one** of **four** herds to be visited by a tour of members of the Italian Holstein Assn. D. E. Horn & Co. Inc. is proud to play a part at Cocalico Farms. We would like to commend Paul Zimmerman on the fine job he has done with his herd and the REFLECTIONS he will lend to the Dairy Industry.
